ADDTEQ

Hidden costs of self hosting dev-tools

Organizations may not be aware of the not so obvious costs of hosting and managing critical tools they rely on for day to day needs.

$30,000/HR
DOWNTIME

Based on $60/hr* for average U.S. IT resource in a 500 users organization.

$28,800/YR
UPGRADE

Based on 480 hours estimate for upgrading JIRA, Confluence and Bitbucket twice a year.

$124,800/YR
MAINTAINANCE

One resource responsible full time.

WHAT IS CODEFACTORI?

Codefactori is a complete solution for software development teams. Addteq wants software teams to be free of restrictions, outages, and other obstacles that stifle productivity and innovation.

With a fully managed, hosted, and customizable software environment, development teams will be able to work the way they want to, not restricted by their tools. Codefactori, coupled with Addteq's DevOps professional services, provide software teams critical insights and techniques on optimizing their release process.

ADDTEQ

CODEFACTORI: KEY FEATURES

MANAGE COSTS

Codefactori is fully managed and hosted. Eliminate capital expenditure costs of hardware, data centers, and payroll for regular maintenance and upgrades.

SCALE SEAMLESSLY

This allows software teams the flexibility to work efficiently without managing their infrastructure. Includes integrations, custom workflows, automated post functions, and triggers.

SECURITY

Codefactori provides enterprise grade security and is designed to ensure the highest level of protection of your data. All communications between the user and Codefactori are over SSL and all applications running on Codefactori are always kept up to date with the Security Advisory.

RELIABILITY

Applications running on Codefactori are monitored 24/7. Backups are taken every 30 minutes and stored in a separate geographical location with full encryption. Codefactori has 99.99% uptime with 30 min RPO and 2 hours RTO.
